Dear Mr Smith

RE: ENVIRONMENT PLAN COMPLETE FOR PUBLIC COMMENT – REGIA MARINE SEISMIC SURVEY

Please be advised that the Regia MSS environment plan (EP) submitted by CGG Services (Australia) Pty Ltd on 18 January 2024, comprising:

- Regia Marine Seismic Survey Environment Plan (Revision 1, dated January 2024); and
- Regia Marine Seismic Survey Sensitive Information Report (Revision 1, Dated January 2024)

has been found to include material apparently addressing all the provisions of Part 4 Division 2 (Contents of an Environment Plan) and be complete in accordance with Section 27 of the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Environment Regulations).

Please note that a decision that the EP is complete is a provisional decision only and is not relevant to other regulatory decisions in relation to acceptability of the plan.

In accordance with Section 28(1) of the Environment Regulations, NOPSEMA has published on its website the above listed documents, with the exception of Regia Marine Seismic Survey Sensitive Information Report, which will not be published as it is considered to be sensitive information under the Environment Regulations.

NOPSEMA has also published an invitation for any person to provide comment on the EP within 30 days of the date of this letter [Section 30(1) of the Environment Regulations].

In accordance with NOPSEMA's Assessment Policy, advertisements inviting comment on the EP should now be published by CGG Services (Australia) Pty Ltd. At a minimum, this should include announcements on CGG Services (Australia) Pty Ltd's website and in relevant regional, state and national newspapers.

Should you have any queries regarding the above, please contact [redacted] on [redacted].

Yours sincerely,

[redacted]
Environment Manager, Offshore Projects & Seismic
