Appendix 8
Consultation: Stakeholder Communications Summary

Cat 1 Commonwealth Department or Agencies								
Relevant Person	***Functions, Interests and Activities***	***Engagement Start Date***	***Engagement End Date***	***Engagement Method***	***Reference***	***Summary***	***Stakeholder Comments***	***Team Assessment & Response***
Australian Communications & Media Authority	Administrator of submarine cable protection zones. Relevant when the activity may impact on subsea cables.	22/02/2024 0:37	22/02/2024 4:41	Outbound Email	BHMW-EM-01-EOG Beehive EP 2 Request to Consult	Template email sent to all relevant persons with a listed email address to commence consultation for Beehive Multi-Well Drilling. Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. Although the Multi-Well Drilling Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive Multi-Well Drilling. Refer to attached flyer. Request to visit website and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A.
		21/02/2024 16:51	21/02/2024 16:51	Inbound Email	BHMW-ACMA- 01 Xen	ACMA confirms their previous comments about the BHMW project and no additional consultation requirements.	ACMA confirms their previous comments about the BHMW project. Not aware of any submarine cables in the vicinity of the project. If EOG become aware, recommend engaging with cable owner/s. Recommendation to contact AHO. Website link provided and contact email for further information. Statement made regarding no requirement for additional consultation.	Response as per BHMW-ACMA- 02 Xen. Remove from communications list and discontinue consultation.
		23/02/2024 0:00	23/02/2024 0:00	Outbound Post / Letter	BHMW-LET-01-EOG Beehive EP 2 Request to Consult	Template letter sent to all relevant persons to commence consultation for Beehive Multi-Well Drilling. Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. Although the Multi-Well Drilling Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive Multi-Well Drilling. Refer to attached flyer. Request to visit website and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A.
		27/02/2024 9:45	27/02/2024 9:45	Outbound Phone Call	BHMW-PH-01-EOG February Telephone Calls	Beehive Multi-Well Drilling EP Outgoing call.	Call receiver did not wish to provide feedback as they had not seen project information. Contact details left with organization for any feedback/comments once organization had reviewed project information.	N/A
		6/03/2024 3:01	6/03/2024 3:01	Outbound Email	BHMW-ACMA-02 Xen	Comments and feedback taken into consideration. Removal of relevant person from consultation.	Thank you for comment. Feedback will be taken into consideration. Acknowledge confirmation that organisation does not require additional consultation and will be removed from consultation list. Reiteration of EOG information website and contact details.	Remove from communications list and discontinue consultation.
		26/04/2024 9:43	26/04/2024 10:15	Outbound Email	BHMW-EM-02-EOG Beehive EP 2 Follow Up Email	Template email sent to all relevant persons with a listed email address to provide an update on consultation for Beehive Multi-Well Drilling.	Follow up to previous information regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to continue providing feedback on these activities. Invitation to engage on Beehive Multi-Well Drilling (MWD) of up to three exploratory wells to take place between January 2025 and December 2029. Although the MWD Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive MWD. OPEP prepared for Beehive-1 applies to MWD. Request to visit website for up-to-date information and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A
		26/04/2024 9:43	26/04/2024 10:15	Outbound Email	BHMW-EM-02-EOG Beehive EP 2 Follow Up Email	Template email sent to all relevant persons with a listed email address to provide an update on consultation for Beehive Multi-Well Drilling.	Follow up to previous information regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to continue providing feedback on these activities. Invitation to engage on Beehive Multi-Well Drilling (MWD) of up to three exploratory wells to take place between January 2025 and December 2029. Although the MWD Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive MWD. OPEP prepared for Beehive-1 applies to MWD. Request to visit website for up-to-date information and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A
Australian Fisheries Management Authority (AFMA)	AFMA is the Australian Government agency responsible for the efficient management and sustainable use of Commonwealth fish resources on behalf of the Australian community. AFMA manages and monitors commerical Commonwealth fishing to ensure Australian fish stocks and the Australian fishing industry is viable now and in the future. Relevant when the activity has the potential to impact on fisheries resources in AFMA-managed fisheries.	22/02/2024 0:37	22/02/2024 4:41	Outbound Email	BHMW-EM-01-EOG Beehive EP 2 Request to Consult	Template email sent to all relevant persons with a listed email address to commence consultation for Beehive Multi-Well Drilling. Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. Although the Multi-Well Drilling Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive Multi-Well Drilling. Refer to attached flyer. Request to visit website and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A.
		23/02/2024 0:00	23/02/2024 0:00	Outbound Post / Letter	BHMW-LET-01-EOG Beehive EP 2 Request to Consult	Template letter sent to all relevant persons to commence consultation for Beehive Multi-Well Drilling. Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. WA Department of Biodiversity, Conservation & Attractions	Manage State marine parks and reserves and protected marine fauna and flora. Relevant when activities undertaken outside a marine park may impact on the values within a marine park.	22/02/2024 0:37	22/02/2024 4:41	Outbound Email	BHMW-EM-01-EOG Beehive EP 2 Request to Consult	Template email sent to all relevant persons with a listed email address to commence consultation for Beehive Multi-Well Drilling. Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. Although the Multi-Well Drilling Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive Multi-Well Drilling. Refer to attached flyer. Request to visit website and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A.

		23/02/2024 0:00	23/02/2024 0:00	Outbound Post / Letter	BHMW-LET-01-EOG Beehive EP 2 Request to Consult	Template letter sent to all relevant persons to commence consultation for Beehive Multi-Well Drilling. Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. Although the Multi-Well Drilling Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive Multi-Well Drilling. 		27/02/2024 14:51	27/02/2024 14:51	Outbound Phone Call	BHMW-PH-01-EOG February Telephone Calls	Beehive Multi-Well Drilling EP Outgoing call.	Call receiver requested that information flyer be resent via email.	N/A
		5/03/2024 1:47	5/03/2024 1:47	Inbound Email	BHMW-DBCA-01 XEN	Thanks EOG for providing the attached information (informational flyer) in relation to the Beehive Project. They have undertaken a review of the documentation and provided comments relevant to the Conservation and Land Management Act 1984 and Biodiversity Conservation Act 2016 responsibilities.	DBCA review and comments relevant to Conservation and Land Management Act 1984 and Biodiversity Conservation Act 2016. Ecologically important areas including marine parks and island/coastal conservation reserves located within the area of the EMBA by the proposed activities, incl. North Kimberley, Lalang-gaddam, Mayala, and Bardi Jawi Gaaraa Marine Parks, Rowley Shoal, Scott Reef, and Browse Island Nature Reserves, Prince Regent National Park and Ord River Conservation Park. Potential for these areas to be affected if there is a hydrocarbon release and particular weather/other environmental conditions. Important that the baseline values and state of affected environment are understood and documented prior to any operations commencing. DBCA would like confidence appropriate baseline survey data on the current state of areas supporting important ecological values and any current contamination if present within the EMBA is established. Following a desktop review and risk assessment, collection of appropriate baseline abundance and distribution data for benthic habitat and marine fauna species, incl. information on the key habitats used by threatened and specially protected fauna for foraging/breeding/aggregating. If no baseline information, assess what baseline information is required commensurate with level of risk and identify suitable sources/methods to attain that information to ensure any impacts on ecological values and recovery of these values can be clearly identified/monitored/remediated. DBCA undertakes monitoring in marine parks/reserves and publishes monitoring reports available on the department's website. Monitoring is targeted to inform DBCA's values and objectives relating, not necessarily suitable to provide all baseline information required for oil spill risk assessment and management planning. DBCA encourages EOG to acquire the necessary information to implement a BACI framework in planning and evaluating its management response. This may include independently monitoring and collecting data or identifying other data sources. Refer EOG to the Commonwealth DCCEEW's National Light Pollution Guidelines for Wildlife as a best-practice industry standard for managing potential impacts of light pollution on marine fauna. In the event of a hydrocarbon release, notify DBCA's Kimberley regional office. DBCA will not implement an oiled wildlife management response on behalf of a petroleum operator except as part of a whole of government response mandated by regulatory decision makers. EOG should also commit to the monitoring and clean-up of DBCA interests affected by an oil spill. Refer EOG to DoT web content regarding marine pollution, and the Offshore Petroleum Industry Guidance Note of July 2020 "Marine Oil Pollution: Response and Consultation Arrangements". Contains information on the WA emergency management arrangements for marine oil pollution incidents, petroleum titleholders' obligations, and the DoT's expectations. Please continue to provide all future notifications to DBCA.	Response as per BHMW-DBCA-03 XEN
		21/03/2024 10:51	21/03/2024 10:51	Outbound Email	BHMW-DBCA-02 XEN	Thanking them for their feedback provided on the 5/3/2024 in relation to the project. They provide explanation to the questions posed in the feedback and a table.	DBCA email notes the North Kimberley, Lalang-gaddam, Mayala, and Bardi Jawi Gaaraa Marine Parks, Rowley Shoal, Scott Reef, and Browse Island Nature Reserves, Prince Regent National Park and Ord River Conservation Park and the potential for these areas to be affected by EOG's operations if there is a substantial hydrocarbon release, subject to particular weather or other environmental conditions. These areas have been considered and described in various parts of the EP and OPEP currently under review by NOPSEMA for the Beehive-1 Exploration Drilling project and are again being considered and will be described in various parts of the Multi-Well Drilling EP and OPEP submissions as listed in the table below. Further, Sections 3 and 4 of Appendix C OSMBIP to the OPEP lists the online sources of baseline data relevant to the high value receptors in the spill EMBA. Section 7 of Appendix C discusses activation of SMP teams to collect additional reactive baseline data post-incident pre-impact. Appendix C-1 of Appendix C provides a lengthy list of sources of baseline data to be accessed in the event of a spill. EOG has considered DCCEEW's National Light Pollution Guidelines for Wildlife guidance document in development of the EP and OPEP. Emergency response contact details in the event of a hydrocarbon spill are included in Section 3.1 of the OPEP. The DBCA's Kimberley office has been included in this section of the OPEP, and we note the comments about the whole-of-government spill response. The DoT's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of September 2018 titled Marine Oil Pollution: Response and Consultation Arrangements have also been taken into consideration, in addition to direct consultation with the DoT. EOG is committed to clean-up and monitoring of areas of DBCA's interests in the event of a hydrocarbon spill; NOPSEMA will not accept the EP unless they are satisfied that EOG has demonstrated the capability to do so	N/A
		26/04/2024 9:43	26/04/2024 10:15	Outbound Email	BHMW-EM-02-EOG Beehive EP 2 Follow Up Email	Template email sent to all relevant persons with a listed email address to provide an update on consultation for Beehive Multi-Well Drilling.	Follow up to previous information regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to continue providing feedback on these activities. Invitation to engage on Beehive Multi-Well Drilling (MWD) of up to three exploratory wells to take place between January 2025 and December 2029. Although the MWD Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive MWD. OPEP prepared for Beehive-1 applies to MWD. Request to visit website for up-to-date information and share feedback. Merit assessment and response process provided. 		9/05/2024 18:26	9/05/2024 18:26	Inbound Email	BHMW-DBCA-03 Xen	DBCA has reviewed the attached information about the Beehive project update and provides the following comments.	DBCA has previously commented to EOG in relation to responsibilities under the CALM Act and BC Act, petroleum activities in proximity to ecologically sensitive receptors, need for comprehensive baseline monitoring of the receptors and oil spill response preparedness. Notes responses received but reiterate its comments in relation to the marine parks, island and coastal conservation reserves which are located within the area of the EOG modelled EMBA. In the event of a hydrocarbon request EOG notify DBCA's Kimberley regional office as soon as practicable. Any additional information in relation to EOG monitoring or oil spill response preparedness for decommissioning activities for DBCA's information is welcome. Please continue to provide all future notifications to DBCA.	N/A

		27/05/2024 19:36	27/05/2024 19:36	Inbound Email	BHMW-RecFish-03 Xen	Thanks EOG for the follow up email regarding the Beehive project and note three points. They maintain the view that recreational fishing is unlikely to be affected by the activities and they look forward to further updates to the project.	Thank you for your follow up email regarding EOG's Beehive Multi-Well Drilling (MWD) campaign in the Joseph Bonaparte Gulf. It is noted that: 1.an environment plan (EP) has now been drafted for the drilling of up to three exploratory wells; 2.the oil spill modelling undertaken in support of the Beehive-1 drilling EP applies to each well within the MWD campaign and the OPEP prepared for Beehive-1 also applies to the MWD campaign; and 3.at this stage, EOG expects to only drill one of the three additional wells, either under the Beehive-1 Exploration Drilling EP or the Beehive MWD EP depending on project timing and objectives at the time. Based on the information provided, Recfishwest maintains the view that recreational fishing is unlikely to be affected by the activities proposed under the Beehive MWD EP. We look forward to receiving further updates as operations progress.	N/A

		26/04/2024 9:43	26/04/2024 10:15	Outbound Email	BHMW-EM-02-EOG Beehive EP 2 Follow Up Email	Template email sent to all relevant persons with a listed email address to provide an update on consultation for Beehive Multi-Well Drilling.	Follow up to previous information regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to continue providing feedback on these activities. Invitation to engage on Beehive Multi-Well Drilling (MWD) of up to three exploratory wells to take place between January 2025 and December 2029. Although the MWD Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive MWD. OPEP prepared for Beehive-1 applies to MWD. Request to visit website for up-to-date information and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A

Includes Beehive February 2024 Flyer as an attachment.	Request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Note previous consultation efforts regarding Beehive Geotechnical Assessment and Beehive-1 Exploration Drilling, including associated activity timings. Invitation to engage on Beehive Multi-Well Drilling of up to three exploratory wells to take place between January 2025 and December 2029. Although the Multi-Well Drilling Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive Multi-Well Drilling. Refer to attached flyer. Request to visit website and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A.

		28/02/2024 16:04	28/02/2024 16:04	Outbound Phone Call	BHMW-PH-01-EOG February Telephone Calls	Beehive Multi-Well Drilling EP Outgoing call.	Call receiver informed that they had received the information from EOG and believed that the information provided to them was too long in format and didn't address the key points succinctly. Receiver wanted it noted that they are opposed to the project and they would prefer for the drilling and blasting to not go ahead. They informed that the fishing industry in the area would be negatively affected by operational activities due to its proximity to the coastline (referenced times of low fishing productivity in the gulf from earthquakes in Indonesia). The receiver noted that she did not think her saying no to the project was going to stop any approvals from going ahead.	N/A
		26/04/2024 9:43	26/04/2024 10:15	Outbound Email	BHMW-EM-02-EOG Beehive EP 2 Follow Up Email	Template email sent to all relevant persons with a listed email address to provide an update on consultation for Beehive Multi-Well Drilling.	Follow up to previous information regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Top End Aboriginal Coastal Alliance (TEACA)	Alliance of Coastal Traditional Owners in the Northern Territory (primarily) and Western Australian (secondarily).	27/05/2024 11:05	27/05/2024 11:22	Inbound Phone Call	BHMW-TEACA-PH-01 XEN	New Organisation identifying as a Relevant Person	Organisation has recently formally established itself to assist engagement between Traditional Owners with proponents of offshore projects. Focus on top end coastal Traditional Owner groups in NT and crossing over in WA. Received a number of consultation communications from various Traditional Owner groups for a variety of offshore projects - including the Beehive project. They requested a status update on the project. They would like to be directly contacted regarding the project, and have made a request for the most recent project communications to be sent to them.	Provided a brief project update from geotech to current beehive multi-well projects, including providing the status of the approvals/submissions to NOPSEMA. Took down the Organisations contact details to include in Consultation Manager for future distributions. Provided information that EOG is a foreign company, and a request will be made for the team who look after the email distributions to send the requested information via email.
		28/05/2024 1:28	28/05/2024 1:28	Outbound Email	BHMW-TEACA-01 XEN	EOG request to consult with the TEACA about the beehive project.	EOG request to consult with the TEACA about the beehive project - template letter adapted for new RP.	N/A.
		28/05/2024 8:30	28/05/2024 8:30	Outbound Post / Letter	BHMW-TEACA-02 XEN	EOG sent a request to consult letter attached with the Beehive February 2024 flyer to update the corporation with the Beehive project.	EOG sent a request to consult letter attached with the Beehive February 2024 flyer to update the corporation with the Beehive project - template letter adapted for new RP.	N/A.
		3/06/2024 6:03	3/06/2024 6:03	Inbound Email	BHMW-TEACA-03 XEN	Refer to the EOG's email sent on the 28 May 2024 to the organisation and have attached correspondence regarding the same project.	The attached letter informs EOG Resources Australia that TEACA is recognised as a relevant party for the Beehive Project stages: Geotechnical Assessment, Exploration Drilling, and Multi-Well Drilling, under the Offshore Petroleum and Greenhouse Gas Storage Regulations. TEACA, a First Nations organisation, represents various coastal territories in the Northern Territory, comprising senior leaders from representative organisations. They aim to facilitate culturally appropriate consultation with Indigenous stakeholders, emphasising in-person engagement. TEACA's expertise in cultural heritage and regulatory compliance aids proponents in satisfying legal requirements. They propose a meeting in Darwin to discuss the project further.	Repsonse as per BHMW-TEACA-04 Xen
		25/06/2024 1:58	25/06/2024 1:58	Outbound Email	BHMW-TEACA-04 Xen	Response to BHMW-TEACA-03 Xen thanking organisation, requesting: clarification on sensitive information, past information needs, consultation; confirmation of feedback and function of organisation.	Thank you for your letter providing information in respect of TEACA as a representative organization of First Nations (FN) persons. We note letter is marked as "Confidential," please advise as to whether that should be considered as a request to treat the correspondence as sensitive information or whether that has been done as standard practice by TEACA in its communications. EOG has been consulting in respect of its activities since 2021. Request to confirm that TEACA have access to our previous Information Flyers or any information or updates TEACA would like. Understand TEACA does not have any general or specific feedback in respect of the proposed Beehive Geotechnical Assessment, Beehive – 1 Exploration Drilling, or Beehive Multi-Well Drilling. Understand TEACA is well positioned to facilitate informed consultation and participation of FN persons in the offshore resources industry and assist to resolve any FN related issues relating to offshore activities. Please note online consultation represents only one of the ways EOG has sought to engage with relevant persons over the last 3 years and this option is offered as one possible way to share information and to conveniently communicate about the proposed activities. EOG has participated in-person meetings in Australia, has held in person meetings, and virtual meetings. EOG seek to engage in ways that are the most appropriate considering the circumstances of such relevant persons and note suggestion to meet with the TEACA Management Committee in Darwin. EOG would welcome the opportunity to discuss the Beehive project. Reuqest for any specific items TEACA would like to discuss or whether TEACA is interested in a general overview. EOG can ensure the correct participants involved and the discussion is efficient and effective. Upon reply, EOG can look to see what can be most suitably arranged to ensure effective and efficient communications going forward.	Repsonse as per BHMW-TEACA-05 Xen
		28/06/2024 5:08	28/06/2024 5:08	Inbound Email	BHMW-TEACA-05 Xen	Response to BHMW-TEACA-04 XEN providing responses and comments.	TEACA provides responses and comments as follows: Query 1 - Confidentiality: Confidential as in ordinary course of business. Not requesting letter is treated as "sensitive information" under OPGGSR. Query 2 - Previous info access: access to 28 May letter. Wish to receive regular updates by email. Reiterate in-person meeting request to consult as required by Regulations. Comment 1 - General or specific feedback: TEACA identify as a relevant person for all Beehive projects (geotech, BH 1 and BHMW). TEACA Management Committee wishes to be consulted, consider information provided and make informed assessment in relation to FIA. TEACA consider themselves not yet consulted and not in a position to provide feedback at this point in time. TEACA are well positioned to facilitate informed consultation and participation of other FN persons and assist resolution of related issues, including identification of other potential FN relevant persons. Comment 2 - Specific item of discussion: Project infrastructure, environmental impacts and control measures (incl. spill modelling and EMBA), FN participation plans and social investment measures. Request relevant managers, environmental scientists and technical experts able to provide sufficient detail and answer questions to attend in person meeting. Comment 3 - Additional details for in person meeting: Committee Members listed and confidential short bio; information on resourcing provided along with billing query; request for GIS shape files, potential meeting dates, names and position titles of representatives to attend.	Response as per BHMW-TEACA-06 Xen
		11/07/2024 8:54	11/07/2024 8:54	Outbound Email	BHMW-TEACA-06 Xen	Response to BHMW-TEACA-05 Xen, and update on submission to NOPSEMA as per other Relevant Persons update.	EOG is working on arrangements to respond to proposed meeting in Darwin, hope to provide response soon but are coordinating across time zones and affected by Hurricane Beryl. Will finalise and get back to TEACA ASAP. Following up on the previous communications sent by EOG Resources Australia Block WA-488 Pty. Ltd. ("EOG") regarding its activity plans and request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Submitted the Beehive Multi-Well Drilling Environment Plan to NOPSEMA (the offshore regulator) for assessment. Invite you to review the current Environment Plan via the NOPSEMA website. You can also access the EOG website link below for the most up to date project information at any time. Reply to this correspondence with any feedback, objections, claims, or if you know of any other persons or organisations that may have interest in this project, by replying via mail, or by phone contact with our Local Consultant Representative. 		28/09/2024 10:00	28/09/2024 10:00	In Person Meeting	BHMW-TEACA-16 Xen	Meeting agenda	Meeting agenda: 1. Welcome, Introductions 2. EOG Presentation - delivered 3. TEACA Presentation - delivered 4. First Nations Participation - no further discussion 5. Discussion and Take-aways 5a. What is EOG doing about their carbon obligations? 5b. Regarding the socioeconomic EMBA, would there be a discernible effect/visible sheen? 5c. Request for a copy of the Oil Spill modelling report Aventus rep passed around. 5d. TEACA recommends to deliver information sessions to the community. 6. Other business	Meeting minutes not distributed, responses to take-aways provided in BHMW-TEACA-17 Xen.

		24/10/2024 0:46	24/10/2024 0:46	Outbound Email	BHMW-TEACA-17 Xen	Thanking TEACA for hosting meeting and follow up on outstanding items.	A. Provision of GIS data B. Follow up on outstanding items: 1. Operations emissions - EOG proactively manages GGE. 2023 Sustainability Report link provided 2. Effect of oil spill on socioeconomic EMBA - EMBA is basis for EP and OPEP, worst case over all variables, socioeconomic thresholds considered below levels which would cause environmental harm, floating oil visibility has a rainbow sheen, shoreline accumulation approx 2 teaspoons/square m, no visibility for dissolved/entrained 3. Additional community consultation - consultation when information to share, at present learning about subsurface and development potential to assess viability, EOG will consider further community meetings as part of ongoing consultation and would work with TEACA to plan appropriate consultation. C. TEACA's Estimated Meeting Costs and Invoicing Procedure	N/A
Top End Aboriginal Corporation Croker Island	Prescribed body corporate (PBC) nominated by Croker Island (DCD1998/001) to represent them and manage their native title rights and interests once a determination that native title exists has been made. Once the court determines that the corporation is to be the PBC, it is entered onto the National Native Title Register as a registered native title body corporate (ss 193(2)(e) and 253 NTA). Croker Island (DCD1998/001) are Determined Native Title Holders with communal, group or individual rights and interests in relation to land and waters, possessed under traditional law and custom, by which these people have a connection with their respective areas recognised under Australian law (s 223 NTA). 		7/08/2024 0:00	7/08/2024 0:00	Inbound Email	BHMW-CCWA-01 Xen	MWEP public exhibition feedback.	CCWA submits that: 1. An unplanned spill event from the Proposal would present high risk to sensitive environmental receptors. 2. Artificial light emissions from the Proposal present high risk to threatened turtle species. 3. The Proposal's noise emissions require further assessment. 4. The risk to Matters of National Environmental Significance (MNES) from ship movements must form part of the environmental assessment of the Proposal. 5. Further assessment of the Proposal's greenhouse gas emissions is required. CCWA recommends: a. The significant impact that the Proposal presents to conservation significant Marine Parks and the associated environmental receptors is unacceptable. b. NOPSEMA not accept the current draft EP without seeking further information from the Proponent in relation to: a. The significant impact that the Proposal presents to conservation significant Marine Parks and the associated environmental receptors is unacceptable. b. NOPSEMA not accept the current draft EP without seeking further information from the Proponent in relation to: i. the management of GHGe, the cumulative impacts of its GHGe in the region, and the measures it will apply to reduce or offset any residual climate impacts from its GHGe; ii. the unplanned oil spill contingency clean-up plan; iii. artificial light risk management and impact mitigation measures; iv. the total noise impacts from the Proposal to sound sensitive species; v. the management and mitigation measures for noise emissions; vi. the cumulative noise impacts to sound sensitive species; and vii. an assessment of the impact of ship movements on MNES and important ecological features.	Response provided as per BHMW-CCWA-02 Xen
		5/09/2024 12:56	5/09/2024 12:56	Outbound Email	BHMW-CCWA-02 Xen	Submission of Public Comment Report in response to comments raised by CCWA.	Submission of Public Comment Report in response to comments raised by CCWA, including attachment: "Environment Plan Beehive Multi-well Exploration Drilling: Public Comment Report". Attached contains EOG response to CCWA and TWS submissions with reference to the EP and OPEP documents both in full, and in particular where the areas have been addressed: 1. Unplanned spill event risk to sensitive environmental receptors: activity is consistent with relevant management plans for JBG and NK Marine Parks, and Ord River Floodplain Ramsar Site. Refer to EP Chapter 5 and Appendix 11. Refer to OPEP Appendix C OSMP. Worst case LoWC: Refer for EP Chapter 9 describing hydrocarbon spill response. Impacts to onshore and offshore ecological communities and fauna: Refer to Chapters 7 and 8, and applicable residual impacts and residual risk rankings. Threat to marine environment and coastline in event of spill: Refer to Appendices 16 and 13. Emergency response: Refer to Tables 2.11, 8.20. 2. Artificial light emissions risk to threatened turtle species: assessment of light management options undertaken and provided in EP Table 7.7. Impact assessment determined "negligible" residual risk ranking. Controls in place have reduced risk to ALARP. 3. Noise emissions: Refer to EP Section 7.5, 2.7.4, 5.4.5, 7.5.4. Control measures listed in Table 7.14. 4. The risk to MNES from ship movements: Refer to EP Section 8.2. Risk assessed as "negligible". Controls in place have reduced risk to ALARP. 5. Further assessment of greenhouse gas emissions: The drilling activity that will determine whether recoverable hydrocarbons are part of the reservoir, therefore only Scope 1 emissions are assessed. Refer to EP Section 7.4.2. 6. Fossil fuel expansion is inconsistent with climate action: note the claim refers to another Proponent. EOG assume the intention is to refer to EOG activities and note the general objection. Under various claim responses it is noted that the BHWM campaign spill EMBA is the same as that for Beehive-1 drilling campaign with no substantial changes between the two activities. The Beehive-1 drilling campaign EP and OPEP were accepted 10 June 2024.	N/A.

		7/08/2024 0:00	7/08/2024 0:00	Inbound Email	BHMW-TWS-01 Xen	MWEP public exhibition feedback	TWS makes the following comments: 1. Fossil fuel expansion is inconsistent with climate action. 2. Threat to the marine environment and coastline in the event of a spill. Recommend NOPSEMA not accept this Environment Plan, and failing that, that NOPSEMA require the proponent to implement the following: The permanent presence of a relief drill to be on standby throughout the operations (the current intent of being able to mobilise a drill from Australia or South East Asia in 77 days is unacceptable). The permanent presence of a dedicated spill/or fire response vessel with sufficient booms and surfactant stored locally to facilitate immediate use. CSIRO or AIMS are commissioned to review the oil spill modelling and risk assessment and to publish the review or actually to do their own modelling and risk assessment. That the company is required to develop a ground-up oil spill response plan where the local council and First Nations groups are given the opportunity to genuinely cooperate in the development of the plan that they are apparently likely to have some responsibility to implement. That no drilling occurs.	Response as per BHMW-TWS-02 Xen/BHMW-TWS-04 Xen.

		5/09/2024 12:56	5/09/2024 12:56	Outbound Email	BHMW-TWS-02 Xen	Submission of Public Comment Report in response to comments raised by TWS. Invitation to engage on Beehive Multi-Well Drilling (MWD) of up to three exploratory wells to take place between January 2025 and December 2029. Although the MWD Program covers up to three wells, at this time EOG plans to drill one single exploration well at Beehive, which could be drilled under either of the EP for Beehive-1 Exploration Drilling or Beehive MWD. OPEP prepared for Beehive-1 applies to MWD. Request to visit website for up-to-date information and share feedback. Merit assessment and response process provided. Sensitive Information statement provided. Contact information provided: website, NOPSEMA page, mailing address, email, local contact number.	N/A
		11/07/2024 1:45	15/07/2024 2:09	Outbound Email	BHMW-EM-03-EOG	Template email sent to all relevant persons with a listed email address to provide an update on consultation for Beehive Multi-Well Drilling.	Following up on the previous communications sent by EOG Resources Australia Block WA-488 Pty. Ltd. ("EOG") regarding its activity plans and request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. Submitted the Beehive Multi-Well Drilling Environment Plan to NOPSEMA (the offshore regulator) for assessment. Invite you to review the current Environment Plan via the NOPSEMA website. You can also access the EOG website link below for the most up to date project information at any time. Reply to this correspondence with any feedback, objections, claims, or if you know of any other persons or organisations that may have interest in this project, by replying via mail, or by phone contact with our Local Consultant Representative. Member of the Public	Respondant to public notice - has not declared any Functions, Interests or Activities	17/07/2024 21:06	17/07/2024 21:06	Inbound Email	BHMW-MOP-01 Xen	Member of the public reaching out in response to public notice to provide comment.	Questions regarding public notice in the West Australian dated 18th of July: Why are you drilling potentially destroying pristine parts of our country and all the wildlife rear or otherwise that inhabit that area? Are you not aware that the planet is being destroyed and an alarming rate based on this kind of activity? What safeguards do you have in place if anything should go wrong which inevitably does at some point? Request not to be pointed to a website due to lack of technological capabilities.	Response as perBHMW-MOP-02 Xen
		31/07/2024 7:49	31/07/2024 7:49	Outbound Email	BHMW-MOP-02 Xen	Response to BHMW-MOP-01 Xen.	Thank you for your email. EOG advises on: operating history; prevention measures; oversight; training, competency and resources; operational and response plans; responses strategies. Proposed operation assesses risk based on EMBA. Model aggregates 300 oil trajectories incorporating worst case assumptions. more than 99% oil should naturally evaporate/dissolve/degrade/entrain without human interference. Request for relevant person status and desire to be consulted + provide detail and indicate FIA affected by proposed activities. Feedback is important, seek feedback to mitigate impacts on FIA on ALARP basis. If there remain outstanding concerns, please contact EOG.	N/A
